

Staff Augmentation for Healthcare Software Company

PROJECT DETAILS

 Staff Augmentation

 Jan 2016 - Ongoing

 Confidential

 *"They have an awesomely friendly company culture that makes a stable team possible over 4 years and counting!"*

PROJECT SUMMARY

Edvantis augmented the team of a healthcare software development company. The team provides nearshore development services for the client.

PROJECT FEEDBACK

The client's company has a dedicated customer base, reflecting on the quality of their products. Edvantis fully integrated with the client's company, establishing a smooth workflow. The team is talented, hard-working, and experienced.

The Client

Please describe your company and your position there.

Doc Cirrus is a software company developing next generation products that connect and enable doctors, pharmacists, patients and other healthcare providers. I lead the software development team, currently around 20.

Ronald Wertlen
Head of Software Development,
Doc Cirrus GmbH

Information technology

Berlin, Germany

The Challenge

For what projects/services did your company hire Edvantis?

We needed to flexibly grow our software development team and have had great success with Edvantis providing a fixed near-shore team of highly skilled developers. Some key product components are developed by Edvantis.

What were your goals for this project?

Create the most modern innovative software product, that allows our company to fulfill its mission.

CLIENT RATING

The Approach

How did you select this vendor?

We started with small projects at several Eastern European providers and stayed with the best one.

Describe the project in detail.

Starting with a team of 3 developers, we have grown to a strength of 7. Edvantis regularly offers new developers for the team. Departures are immediately filled with equivalent personell. The team is 100% dedicated to Doc Cirrus, and all tasks are led and managed from our Berlin offices. Because the team has stayed stable, tech onboarding of new team members is handled remotely and efficiently.

What was the team composition?

1 Agile scrum team of 6 developers and 1 lead developer.

The Outcome

Can you share any outcomes from the project that demonstrate progress or success?

Our large customer base stands for the progress and success of our work.

How effective was the workflow between your team and theirs?

The team is fully integrated in our agile Scrum method, meaning daily standups and daily technical meetings. Additionally, the team participates actively in all sprint reviews/ planning meetings, etc. The team is highly reliable and always responsive.

What did you find most impressive about this company?

Excellent offering - great developers with great value. They have an awesomely friendly company culture that makes a stable team possible over 4 years and counting!

Are there any areas for improvement?

Prices have increased in the past years as the Ukrainian market approaches Western standards.
